

PRESS RELEASE

Ameri Metro Inc. Acquires Saray Copper Mine in Chile with Over \$50 Billion of In-Ground Assets

York, PA / Belfast / Chile – August 20, 2025 – Ameri Metro Inc. today announced the landmark acquisition of the Saray Copper Mine in Chile, supported by an independent geological report confirming more than \$50 billion USD (\$50,000,000,000) in proven in-ground copper reserves. As one of the largest confirmed copper deposits in Chile—the world’s leading copper producer—Saray represents a strategic resource critical to global electrification, renewable energy, and infrastructure demand. This acquisition positions Ameri Metro at the forefront of both natural resource development and the tokenized finance revolution, marking one of the most significant copper transactions ever recorded.

As part of the agreement, current mine management will remain in place to ensure operational continuity, while Ameri Metro Inc. assumes responsibility for financial structuring, tokenization, and strategic growth.

The acquisition was completed using Wyoming-registered digital legal tender tokens, underscoring the state’s global leadership in digital asset legislation and the credibility of tokenized finance. The transaction was powered by the Ameri Legal Tender Token, valued at \$650,075 each; the Ameri Coin, valued at \$483,820 each; and the North American Oil, Gas & Utilities Token, valued at \$817,386 each. By deploying these blockchain-based legal tender tokens, Ameri Metro not only executed one of the largest tokenized resource deals in history but also set a benchmark for how blockchain finance can seamlessly support multi-billion-dollar natural resource acquisitions.

Ameri Metro Inc. and GMTX.Exchange extend thanks to the State of Wyoming, whose pioneering digital asset legislation made this historic acquisition possible and established a new global standard for blockchain-enabled finance.

In keeping with GMTX.Exchange privacy protocols, the precise token quantities are not disclosed publicly.

“This acquisition proves that blockchain-based legal tender tokens are no longer theoretical—they are financing some of the largest real-world resource projects on earth,” said Shah Mathias, Chairman of Ameri Metro Inc.

“CRISM Solutions Ltd. is proud to continue managing Saray Copper under the new ownership structure. Our team is fully committed to operational efficiency and unlocking the mine’s full potential,” said Martin Rice, CEO of CRISM Solutions Ltd.

About Ameri Metro Inc.

Ameri Metro Inc. is a Delaware-based corporation specializing in large-scale infrastructure, energy, and natural resource projects. The company leverages innovative financing strategies, including blockchain-based tokenization, to execute transformative acquisitions and long-term developments worldwide.

About CRISM Solutions Ltd.

CRISM Solutions Ltd., headquartered in Belfast, specializes in mining operations and resource management. With decades of experience in copper, gold, and industrial minerals, the company provides full-scale operational oversight, technical expertise, and efficiency strategies to maximize the value of mining assets worldwide.
